To Whom It May Concern,

I have found Ms. Segal to be of outstanding character, technically very skilled and responsible , reliable, and serious in her professional activities. My opinions were formed from reading   of her Master's Thesis in computer science about the RSA security model. I believe her research capabilities are excellent from my familiarity with her projects on Night Vision Training System for Night Vision Goggles (NVS for NVG) and Intelligent tutoring System for Aircraft Training (ITSAIR).

She is very dedicated to her students and teaches them with passion and technical expertise.

Sincerely,

Charles Albert

Consultant
